TABLE OF CONTENTS

The bibliography is arranged in reverse chronological order (most recent year first) and within each year the citations are listed alphabetically by title.

Year of Citation	Page
1987	1
1986	4
1985	10
1984	18
1983	25
1982	33
1981	37
1980	39
Author Index	42
Organization and Conference Index	50

This bibliography supersedes the Bibliography on Biological Effects of Electric and Magnetic Fields (1980-1986), published November 1986.

Bibliography on biological effects of electric and magnetic fields, 1980-1987

Includes indexes.
ISBN 0-7726-0779-6

1. Electric fields - Physiological effect - Bibliography. 2. Magnetic fields - Physiological effect - Bibliography. 3. Electromagnetism - Physiological effect - Bibliography. I. Title.

Z7994.A5B25 1987 016.57419'17 C88-092047-5

1987

** 1. Are power lines hazardous to health? by Andrew A. Marino and H. B. Graves. Public Power July-August 1987, 18-21.

** 2. Bird behavior and mortality in relation to power lines in prairie habitats, by Craig A. Faanes. U. S. Fish and Wildlife technical report 7, 1987. 24 pp.

** 3. Brain tumor mortality risk among men with electrical and electronics jobs: a case-control study, by Terry L. Thomas, Paul D. Stolley, Annette Stemhagen, Elizabeth T. H. Fontham, Margit L. Bleecker, Patricia A. Stewart and Robert N. Hoover. JNCI: Journal of the National Cancer Institute 79, No. 2 (1987), 233-238.

** 4. Brown adipose tissue thermogenesis induced by low level electrical stimulation of hypothalamus in rats, by Patricia H. Freeman and Paul J. Wellman. Brain Research Bulletin 18 (1987), 7-11.

** 5. Cellular effects of electromagnetic radiation, by Stephen F. Cleary. IEEE Engineering in Medicine and Biology Magazine March 1987, 26-30.

** 6. Compensation of the natural magnetic field does not alter N-acetyltransferase activity and melatonin content of rat pineal gland, by Roderich Khoory. Neuroscience Letters 76, No. 2 (1987), 215-220.

** 7. Current facts on pacemaker electromagnetic interference and their application to clinical care, by Diane Proctor Sager. Heart & Lung 16, No. 2 (1987), 211-221.

** 8. Detection of 60-Hertz vertical electric fields by rats, by Philip M. Sagan, Mark E. Stell, Guy K. Bryan and W. Ross Adey. Bioelectromagnetics 8, No. 3 (1987), 303-313.

** 9. Developmental studies of Hanford miniature swine exposed to 60-Hz electric fields, by M. R. Sikov, D. N. Rommereim, J. L. Beamer, R. L. Buschbom, W. T. Kaune, and R. D. Phillips. Bioelectromagnetics 8, No. 3 (1987), 229-242.

** 10. ELF: the current controversy, by Diane D. Edwards. Science News 131 (1987), 107-109.

** 11. EMF: the debate on health effects. EPRI Journal October/November 1987, 4-15.

** 12. EPRI increasing research on electromagnetic fields. Public Power July-August 1987, 23, 25.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

** 13. Effect of electric currents on DNA synthesis in rat osteosarcoma cells: dependence on conditions that influence cell growth, by Masaki Noda, David E. Johnson, Allesandro Chiabrera, and Gideon A. Rodan. Journal of Orthopaedic Research 5 (1987), 253-260.

** 14. Effect of relative humidity on the movement of rat vibrissae in a 60-Hz electric field, by R. J. Weigel and D. L. Lundstrom. Bioelectromagnetics 8, No. 1 (1987), 107-110.

** 15. Effects of ambient levels of power-line-frequency electric fields on a developing organism, by C. F. Blackman, D. E. House, S. G. Benane, W. T. Joines and R. J. Spiegel. 31st Annual Meeting of the Biophysical Society, Feb. 22-26, 1987, New Orleans. Biophysical Journal 51, No. 2 part 2 (1987), 69a. Abstract only.

** 16. Effects of an earth-strength magnetic field on pineal melatonin synthesis in pigeons, by S. Reuss and P. Semm. Naturwissenschaften 74 (1987), 38-39.

** 17. Effects of 50-Hz electric currents on vigilance and concentration, by B. T. Stollery. British Journal of Industrial Medicine 44 (1987), 111-118.

** 18. Effects of 60-Hz electric fields on cellular elongation and radial expansion growth in cucurbit roots, by Andrew A. Brayman, Morton W. Miller, and Christopher Cox. Bioelectromagnetics 8, No. 1 (1987), 57-72.

** 19. Electric field exposure from electric blankets, by H. K. Florig, J. F. Hoburg and M. G. Morgan. IEEE Transactions on Power Delivery PWRD-2, No. 2 (1987), 527-536.

** 20. Electric power use and breast cancer: a hypothesis, by Richard G. Stevens. American Journal of Epidemiology 125, No. 4 (1987), 556-561.

** 21. Electromagnetic field interaction with the human body: a critical review by K. A. Zeh. Elektron January 1987, 7-11.

** 22. Environmental and occupational exposure to electromagnetic fields, by Maria A. Stuchly. IEEE Engineering in Medicine and Biology Magazine March 1987, 15-17.

** 23. Finite difference calculations of current densities in a homogeneous model of a man exposed to extremely low frequency electric fields, by P. J. Dimbylow. Bioelectromagnetics 8, No. 4 (1987), 355-375.

** 24. Geophysical variables and behavior: XXXIX: alterations in imaginings and suggestibility during brief magnetic field exposures, by Christine F. DeSano and M. A. Persinger. Perceptual and Motor Skills 64 (1987), 968-970.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

** 25. Health effects of extremely low frequency electromagnetic fields: a review of clinical and epidemiological studies. Ontario Ministry of Health, Disease Control and Epidemiology Service, 1987. 62 pp.

** 26. Influence of pulsing electromagnetic field on the frequency of sister-chromatid exchanges in cultured mammalian cells, by K. Takahashi, I. Kaneko, M. Date and E. Fukada. Experientia 43 (1987), 331-332.

** 27. Leukemia and occupational exposure to electromagnetic fields: review of epidemiological surveys, by David A. Savitz and Eugenia E. Calle. Journal of Occupational Medicine 29, No. 1 (January 1987), 47-51.

** 28. Low energy pulsing electromagnetic fields modify biomedical processes, by C.A.L. Bassett. BioEssays 6, No. 1 (1987), 36-42.

** 29. A magnetic field generates morphological changes in guinea pig bone marrow, by Eleonora Gorczynska. Folia Morphologica 35, No. 1 (1987), 40-45.

** 30. Noradrenaline inhibits vasoconstriction induced by electrical stimulation, by J. Atkinson, N. Boillat, A. K. Fouda, H. Guillain, M. Sautel and M. Sonnay. General Pharmacology 18, No. 3 (1987), 219-223.

** 31. Occupational risks for intracranial gliomas in Sweden, by Joseph K. McLaughlin, Hans S. R. Malker, William J. Blot, Birgitta K. Malker, B. J. Stone, Jan A. Weiner, Jan L. E. Ericsson and Joseph F. Fraumeni. JNCI: Journal of the National Cancer Institute 78, No. 2 (1987), 253-257.

** 32. Power-frequency fields: the regulatory dilemma, by M. Granger Morgan, H. Keith Florig, Indira Nair, and Gordon L. Hester. Issues in Science and Technology III, No. 4 (1987), 81-91.

** 33. Power-line fields and people, by Brian Maddock and John Male. Physics Bulletin 38, No. 9 (1987) 345-347.

** 34. Power lines and cancer: the evidence grows, by Louis Slesin. Technology Review October 1987, 53-59.

** 35. Power lines, fields and good health, by W. T. Norris. Power Engineering Journal November 1987, 339-347.

** 36. Public exposure to power-frequency fields, by B. J. Maddock. CIGRE Montreal Colloquium 8-9 June 1987. 9 pp.

** 37. Reproduction and development in rats chronologically exposed to 60-Hz electric fields, by D. N. Rommereim, W. T. Kaune, R. L. Buschbom, R. D. Phillips and M. R. Sikov. Bioelectromagnetics 8, No. 3 (1987), 243-258.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

** 38. Residential magnetic and electric fields, by W. T. Kaune, R. G. Stevens, N. J. Callahan, R. K. Severson and D. B. Thomas. Bioelectromagnetics 8, No. 4 (1987), 315-335.

** 39. Sensitivity to electricity in the catfish, Parasiluris Asotus, by Masamitsu Asano and Isao Hanyu. Comparative Biochemistry and Physiology A: Comparative Physiology 86, No. 3 (1987), 485-490.

** 40. 60-Hz electric and magnetic fields generated by a distribution network, by Paul Heroux. Bioelectromagnetics 8, No. 2 (1987), 135-148.

** 41. Stimulation of cutaneous mechanoreceptors by 60 Hz electric fields, by R. J. Weigel, R. A. Jaffe, D. L. Lundstrom, W. C. Forsythe and L. E. Anderson. Bioelectromagnetics 8, No. 4 (1987), 337-350.

** 42. Test for the effects of 60-Hz magnetic fields on fecundity and development in Drosophila, by Ellen Walters and Edwin L. Carstensen. Bioelectromagnetics 8, No. 4 (1987), 351-354.

** 43. A utility response to concerns about power line effects, by John P. O'Grady. Public Power July - August 1987, 26-27.

1986

** 44. Advice on the protection of workers and members of the public from the possible hazards of electric and magnetic fields with frequencies below 300 GHz: a consultative document. Didcot: National Radiological Protection Board, 1986. 17 pp.

45. Association of paternal occupation with childhood cancer, by J. D. Sahl. American Journal of Epidemiology 123, No. 5 (1986), 921-922. Letter to the editor and the authors' reply.

46. Background radiation, electrical work, and some other exposures associated with acute myeloid leukemia in a case-referent study, by Ulf Flodin, Mats Fredriksson, Olav Axelson, Bodil Persson and Lennart Hardell. Archives of Environmental Health 41, No. 2 (1986), 77-84.

47. Behavioral monitoring of rats during exposure to air ions and DC electric fields, by William H. Bailey and Jonathan M. Charry. Bioelectromagnetics 7, No. 3 (1986), 329-339.

** 48. Biological effects of extremely-low-frequency magnetic fields, by T. S. Tenforde. University of California. Lawrence Berkeley Lab. LBL 20765, 1986. 21 pp.

** 49. Biological effects on rats of chronic exposure to 50-Hz fields of moderate intensity, by J. Behari, R. Mathur, K. N. Sharma and J. M. Datta. Journal of Bioelectricity 5, No. 2, (1986), 335-342.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

50. CRC handbook of biological effects of electromagnetic fields, edited by Charles Polk and Elliot Postow. Boca Raton: CRC Press, 1986. 503 pp.

51. Cancer in the electric power industry, by S. Tornqvist, S. Norell, A. Ahlbom, and B. Knave. British Journal of Industrial Medicine 43 (1986), 212-213.

52. Cardiovascular responses of cows given electrical current during milking, by R. C. Gorewit and N. R. Scott. Journal of Dairy Science 69, No. 4 (1986), 1122-27.

53. A case-control study of leukemia at a naval nuclear shipyard, by Frank B. Stern, Richard A. Waxweiler, James J. Beaumont, Shiu T. Lee et al. American Journal of Epidemiology 123, No. 6 (1986), 980-992.

54. Chronic 60-Hz electric field exposure-induced subtle bioeffects on hematology, by Y. J. Seto, D. Majeau-Chargois, J. R. Lymangrover, W. P. Dunlap, F. T. Fox and S. T. Hsieh. Environmental Research 39 (1986), 143-152.

** 55. A critical review of the scientific literature on low-frequency electric and magnetic fields: assessment of possible effects on human health and recommendations for research: executive summary, by Western Energy Supply and Transmission (WEST) Associates. Project management by Southern California Edison Company, 1986. Project No. ET-84-11. 7 pp.

** 56. Development of chick embryos in 1 Hz to 100 kHz magnetic fields, by J. Juutilainen and K. Saali. Radiation and Environmental Biophysics 25 (1986), 135-140.

** 57. Effect of air ions on the membrane Na, K-ATPase activity of L-1210 cells, by J. M. Witkowski, J. Jaskowski and A. Mysliwski. General Physiology and Biophysics 5, No. 5 (1986), 505-510.

** 58. The effect of alpha-2-adrenoceptor agonists on the acid secretory responses of rat isolated gastric mucosa to electrical field stimulation, by P. W. Dettinar and J.A.H. Lord. British Journal of Pharmacology 89, No. 2 (1986), 361-366.

** 59. The effect of exposure to positive space charge on aversive responses to noxious stimuli in rats, by C. J. Beardwood, A. Abrahams and P. M. Jordi. Life Sciences 39, No. 24 (1986), 2359-2369.

** 60. Effect of extremely-low-frequency pulsed magnetic fields on the mitogenic response of peripheral blood mononuclear cells, by Nuala A. Mooney, Roy E. Smith, and Bernard W. Watson. Bioelectromagnetics 7, No. 4 (1986), 387-394.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

** 61. Effect of low-level, 60-Hz electromagnetic fields on human lymphoid cells: I. Mitotic rate and chromosome breakage in human peripheral lymphocytes, by Maimon M. Cohen, Anna Kunska, Jacqueline A. Astemborski, Duncan McCulloch and David A. Paskewitz. Bioelectromagnetics 7, No. 4 (1986), 415-423.

** 62. The effect of low-level 60-Hz electromagnetic fields on human lymphoid cells. II. Sister-chromatid exchanges in peripheral lymphocytes and lymphoblastoid cell lines, by Maimon M. Cohan, Anna Kunska, Jacqueline A. Astemborski and Duncan McCulloch. Mutation Research 172, No. 2 (1986), 177-184.

** 63. Effects of extremely-low-frequency electric fields on neuronal activity in rat brain, by R. P. Blackwell. Bioelectromagnetics 7, No. 4 (1986), 425-434.

64. Effects of 50-Hz electric currents on mood and verbal reasoning skills, by B. T. Stollery. British Journal of Industrial Medicine 43 (1986), 339-349.

65. The effects of long-term air ion and DC electric field exposures on survival characteristics in female NAMRU mice, by Edwin Welles Kellogg III and Michael George Yost. Journal of Gerontology 41, No. 2 (1986), 147-153.

** 66. Effects of 100-Hz magnetic fields with various waveforms on the development of chick embryos, by J. Juutilainen, M. Harri, K. Saali and T. Lahtinen. Radiation and Environmental Biophysics 25, No. 1 (1986), 65-74.

67. Effects of sinusoidal 60-Hz electric and magnetic fields on ATP and oxygen levels in the slime mold, Physarum polycephalum, by M. T. Marron, E. M. Goodman, B. Greenebaum and P. Tipnis. Bioelectromagnetics 7, No. 3 (1986), 307-314.

** 68. Electric and magnetic fields from power transmission systems: results of an international survey, by CIGRE Working Group 36-01. CIGRE Proceedings 1986, paper No. 36-09. 7 pp.

69. Electric field - biological systems interaction applied to animals and man, by Sol M. Michaelson. Veterinary and Human Toxicology 28, No. 1 (1986), 19-30.

** 70. Electrical current sensitivity of growing/finishing swine for drinking, by Robert J. Gustafson, Robert D. Appleman and Thomas M. Brennan. Transactions of the American Society of Agricultural Engineers 24, No. 2 (1986), 592-600.

71. Emerging issues in extremely-low-frequency electric and magnetic field health research, by Robert I. Kavet and Robert S. Banks. Environmental Research 39 (1986), 386-404.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

72. Enhancing effect of low frequency pulsed electromagnetic fields on lectin-induced human lymphocyte proliferation, by M. Cantini, A. Cossarizza, F. Bersani, R. Cadossi et al. Journal of Bioelectricity 5, No. 1 (1986), 91-104.

** 73. Epidemiologic study of Holstein dairy cow performance and reproduction near a high-voltage direct-current powerline, by Frank B. Martin, Alan Bender, Gerald Steuernagel, R. Ashley Robinson, Rodney Revsbech, Dale K. Sorensen, Norman Williamson and Allan Williams. Journal of Toxicology and Environmental Health 19 (1986), 303-324.

74. The epidemiologist in court: some comments, by D. E. Lilienfeld and B. Black. American Journal of Epidemiology 123, No. 6 (1986), 961-964.

75. Exposure to electromagnetic fields and the risk of leukemia, by Kazim Sheikh. Archives of Environmental Health 41, No. 1 (1986), 56-63.

76. 50-Hz electromagnetic environment and the incidence of childhood tumors in Stockholm County, by Lennart Tomenius. Bioelectromagetics 7, No. 2 (1986), 191-207.

77. A health examination of railway high-voltage substation workers exposed to ELF electromagnetic fields, by P. Baroncelli, S. Battisti, A. Checcucci, P. Comba, M. Grandolfo, A. Serio and P. Vecchia. American Journal of Industrial Medicine 10 (1986), 45-55.

** 78. Human exposure to static and time-varying magnetic fields, by Maria A. Stuchly. Health Physics 51, No. 2 (1986), 215-225.

** 79. Inhibition of respiration in cats by ELF electric fields, by John W. Lockard, Jr., Edwin L. Carstensen and Thomas Morris. IEEE Transactions on Biomedical Engineering BME-33, No. 5 (1986), 473-476.

** 80. Interference from 60 Hz electric and magnetic fields on personal computers, by Rod S. Baishiki and Don W. Deno. IEEE Transmission and Distribution Conference 1986. Paper No. 86T&D 609-2. 6 pp.

** 81. International Utility Symposium: health effects of electric and magnetic fields: research, communication, regulation. Held 16-19 September 1986 in Toronto. Sponsored by Electric Power Research Institute, Canadian Electrical Association, Edison Electric Institute, National Rural Electric Cooperative Association, Bonneville Power Administration and Ontario Hydro. Toronto: Ontario Hydro, 1986. vp.

82. Intracellular recording during magnetic field application to monitor neurotransmitter release events: methods and preliminary results, by R. Gundersen, B. Greenebaum and M. Schaller. Bioelectromagnetics 7, No. 3 (1986), 271-281.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

** 83. Investigation of electric fields and currents acting on personnel of extrahigh- and superhigh-voltage substations, by F. G. Kaidanov. Power Engineering 24, No. 5 (1986), 95-101.

84. In vitro exposure to electromagnetic fields: changes in tumour cell properties, by Jerry L. Phillips, Wendell D. Winters and Loyce Rutledge. International Journal of Radiation Biology 49, No. 3 (1986), 463-469.

** 85. Ionising radiation: a guide to the regulations, by Dr. Donald Hughes. Occupational Health 38, No. 11 (1986), 362-366.

** 86. Ionising radiation and its biological effects, by Dr. Graham Green. Occupational Health 38, No. 11 (1986), 354-357.

** 87. Leukemia among New Zealand agricultural workers: a cancer registry-based study, by Neil E. Pearce, Raewyn A. Sheppard, J. Keir Howard, James Fraser and Barbara M. Lilley. American Journal of Epidemiology 124, No. 3 (1986), 402-409.

** 88. Limits for electric and magnetic fields in DIN VDE standards: considerations for the range 0 to 10 kHz, by J. H. Bernhardt, H. J. Haubrich, G. Newi, N. Krause and K. H. Schneider. CIGRE Proceedings 1986, paper No. 36-10. 9 pp.

** 89. Low-intensity magnetic fields alter operant behavior in rats, by John R. Thomas, John Schrot, and Abraham R. Liboff. Biolectromagnetics 7, No. 4 (1986), 349-357.

90. Magnetic field effects on the rat pineal gland: role of retinal activation by light, by S. Reuss and J. Olcese. Neuroscience Letters 64, No. 1 (1986), 97-101.

** 91. Magnetic field provokes the increase of prostacyclin in aorta of rats, by E. Gorczynska and R. Wegrzynowicz. Naturwissenschaften 73, No. 11 (1986), 675-677.

** 92. Magnetic fields abolish nychthemeral rhythmicity of responses of Purkinje cells to the pineal hormone melatonin in the pigeon's cerebellum, by C. Demaine and P. Semm. Neuroscience Letters 72 (1986), 158-162.

93. Measurement of small mechanical vibrations of brain tissue exposed to extremely low-frequency electric fields, by R. J. Spiegel, J. S. Ali, J. F. Peoples and W. T. Joines. Bioelectromagnetics 7, No. 3 (1986), 295-306.

** 94. Measurements of extremely low-frequency magnetic fields around video display terminals, by Jukka Juutilainen and Keijo Saali. Scandinavian Journal of Work and Environmental Health 12, No. 6 (1986), 609-613.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

95. Mitogen dose-dependent effect of weak pulsed electromagnetic field on lymphocyte blastogenesis, by P. Conti, G. E. Gigante, M. G. Cifone, E. Alesse, C. Fieschi, M. Bologna and P. U. Angeletti. FEBS Letters 199, No. 1 (1986), 130-134.

96. Motility of cultured fish epidermal cells in the presence and absence of direct current electric fields, by Mark S. Cooper and Manfred Schliwa. Journal of Cell Biology 102 (1986), 1384-1399.

97. Mortality of persons resident in the vicinity of electricity transmission facilities, by M. E. McDowall. British Journal of Cancer 53 (1986), 271-279.

** 98. Nonthermal effects of nonionizing radiation. U. S. National Research Council, 1986. NTIS PB86-203064. 16 pp.

** 99. Osteoclasts and osteoblasts migrate in opposite directions in response to a constant electrical field, by Jack Ferrier, Stephen M. Ross, Junya Kanehisa and Jane E. Aubin. Journal of Cellular Physiology 129 (1986), 283-288.

100. Possible effects of electric blankets and heated waterbeds on fetal development, by Nancy Wertheimer and Ed Leeper. Bioelectromagnetics 7, No. 1 (1986), 13-22.

101. Pulsed electromagnetic fields and normal chick development, by Betty F. Sisken, Ira Fowler, Chris Mayaud, John P. Ryaby, James Ryaby and Authur A. Pilla. Journal of Bioelectricity 5, No. 1 (1986), 25-34.

** 102. Research on biological effects of power frequency fields, by J. A. Bonnell, B. J. Maddock, J. C. Male, W. T. Norris, J. Cabanes, C. Gary, R. Conti, P. Nicolini, V. Margonato, A. Vecsteinas, and P. Ceretelli. CIGRE Proceedings 1986, paper No. 36-08. 9 pp.

** 103. Response of sensory receptors of the cat's hindlimb to a transient, step-function dc electric field, by M. Kato, S. Ohta, T. Kobayashi and G. Matsumoto. Biolectromagnetics 7, No. 4 (1986), 395-404.

104. Risk research: when should we say "enough"? by M. Granger Morgan. Science 232, No. 4753, 23 May 1986, 917.

105. 60-Hz electric-field effects on pineal melatonin rhythms: time course for onset and recovery, by B. W. Wilson, E. K. Chess and L. E. Anderson. Bioelectromagnetics 7, No. 2 (1986), 239-242.

** 106. Some biological effects of electromagnetic fields, by Reba Goodman and Ann S. Henderson. Bioelectrochemistry and Bioenergetics 15 (1986), 39-55.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

BR181

** 107. Space charge drift from a +/- 400-kV direct current transmission line, by Riley C. Hendrikson. Bioelectromagnetics 7, No. 4 (1986), 369-379.

** 108. Studies on electric field and ion current at ground level under modelled HVDC transmission lines, by Masanori Hara and Takanori Tsutsumi. Journal of Electrostatics 18 (1986), 163-177.

109. A survey of cancer and occupation in young and middle aged men II: Non-respiratory cancers, by D. Coggon, P. Pannett, C. Osmond, and E. D. Acheson. British Journal of Industrial Medicine 43 (1986), 381-386.

110. Transmission and distribution in the United States: "A Look Ahead", by Wallace B. Behnke. IEEE Power Engineering Review May 1986, 3-5.

1985

111. Analysis of BPA occupational electric field exposure data: final report, by T. Dan Bracken, U.S. Bonneville Power Administration, 1985. DOE/BP/36303-1. vp.

112. Animal studies on electric field effects: R&D status report, by Robert M. Patterson. EPRI Journal 10, No. 5 (1985), 52-53.

113. Assessments and viewpoints on the biological and human health effects of extremely low frequency (ELF) electromagnetic fields: compilation of commissioned papers for the ELF Literature Review Project. Washington: American Institute of Biological Sciences, 1985. 461 pp.

114. Behavioral studies of dairy cow sensitivity to AC and DC electric currents, by Robert J. Gustafson, Thomas M. Brennan, and Robert D. Appleman. American Society of Agricultural Engineers Transactions 28, No. 5 (1985), 1680-1685.

115. Behavioral studies with electromagnetic fields: implications for psychobiology, by Rochelle Medici. Journal of Bioelectricity 4, No. 2 (1985), 527-552.

116. Bioelectrical research in Italy, by Ruggeres Cadossi. Journal of Bioelectricity 4, No. 1 (1985), 143. Editorial.

117. Biological and human health effects of extremely low frequency electromagnetic fields: post-1977 literature review. Arlington: American Institute of Biological Sciences, 1985. Report of the Committee on Biological and Human Health Effects of Extremely Low Frequency Electromagnetic Fields. 328 p.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

118. Biological effects of electric fields on agricultural animals, by H. Dwight Mercer. Veterinary and Human Toxicology 27, No. 5 (1985), 422-426.

** 119. Biological effects of electromagnetic fields: an update, by Gordon W. Newell. American Power Conference 1985, 706-709.

120. Biological effects of extremely low frequency electromagnetic fields, by J.M.R. Delgado. Journal of Bioelectricity 4, No. 1 (1985), 75-91.

121. Biological effects of high-frequency electromagnetic fields on Salmonella typhimurium and Drosophila melanogaster, by Yngve Hamnerius, Asa Rasmuson, and Bertil Rasmuson. Bioelectromagnetics 6, No. 4 (1985), 405-414.

122. Biological effects of overhead electric transmission lines: a technical or a social issue? by Scott A. Smith. Right of Way February 1985, 6-9.

123. Cancer among workers exposed to strong static magnetic fields, by Lars Barregard, Bengt Jarvholm and Eugen Ungethum. The Lancet Oct. 19, 1985, p. 892. Letter to the editor.

124. Chromosomal aberrations induced by ELF electric fields, by G. d'Ambrosio, A. Scaglione, D. Di Berardino and M. B. Lioi. Journal of Bioelectricity 4, No. 1 (1985), 279-284.

125. Chronic electromagnetic stressors in the environment: a risk factor in human cancer, by Andrew A. Marino and Don M. Morris. Journal of Environmental Science and Health C3, No. 2 (1985), 189-219.

126. Classical psychophysics and ELF magnetic field detection, by M. A. Persinger. Journal of Bioelectricity 4, No. 2 (1985), 577-584. Letter.

127. Comments on variables in research involving electromagnetic bio-effects, by W. C. Parkinson. Journal of Bioelectricity 4, No. 2 (1985), 585-587.

128. Constant magnetic field influence on passive electrical properties of red blood cells, by M. S. Markov and F. Pliquett. Bioelectrochemistry and Bioenergetics 14 (1985), 495-502.

129. Corona and field effects of AC overhead transmission lines: information for decision makers. IEEE Power Engineering Society. 1985. 62 pp.

130. Current densities measured in human models exposed to 60-Hz electric fields, by W. T. Kaune and W.C. Forsythe. Bioelectromagnetics 6, No. 1 (1985), 13-32.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

131. Current problems of nonionizing radiation, by Nikolai F. Izmerov. Scandinavian Journal of Work, Environment & Health 11 (1985), 223-227.

132. A cytohistological analysis of roots whose growth is affected by a 60-Hz electric field, by Annie Brulfert, Morton W. Miller, Dominique Robertson, David A. Dooley and Peter Economou. Bioelectromagnetics 6, No. 3 (1985), 283-291.

133. Design, construction, and testing of a DC bioeffects enclosure for small animals, prepared by Battelle Pacific Northwest Laboratories. EPRI EA-4189, July 1985. vp.

134. Destruction of human hemoglobin in the presence of water and negative air ions generated by corona discharge, by S. C. Goheen, M. G. Bissell, G. A. Rao and E. C. Larkin. International Journal of Biometeorology 29, No. 4 (1985), 353-359.

135. Developmental effects of chronic electric field exposure in rats, by Don N. Rommereim, William T. Kaune, Ray L. Buschbom, Richard D. Phillips and Melvin R. Sikov. Proceedings of the Society for Experimental Biology and Medicine 178, No. 1 (1985), 171.

136. Effect of electromagnetic fields on two calcium dependent biological systems, by Pio Conti, G. E. Gigante, M. G. Cifone and E. Alesse. Journal of Bioelectricity 4, No. 1 (1985) 227-236.

137. Effect of low-frequency low-energy pulsing electromagnetic fields on the response to lectin stimulation of human normal and chronic lymphocytic leukemia lymphocytes, by G. Emilia, G. Torelli, G. Ceccherelli, and A. Donelli. Journal of Bioelectricity 4, No. 1 (1985), 145-161.

138. Effects of electric field exposure on some indices of CNS arousal in the mouse, by R. P. Blackwell and A. L. Reed. Bioelectromagnetics 6, No. 1 (1985), 105-107.

139. Effects of electric field near 750 kV transmission line and protection against their harmful consequences, by M. Paulusz. IEE International Conference on Electric and Magnetic Fields in Medicine and Biology 4 - 5 December 1985. pp. 108-111.

140. The effects of high-voltage transmission lines on honeybees, prepared by Bioconcern and IIT Research Institute. EPRI EA-3898, May 1985. vp.

141. Effects of 60-Hz electric fields on embryo and chick development, growth and behaviour, prepared by Westinghouse Electric Corporation and the Pennsylvania State University. EPRI EA-4161, July 1985. vp.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

142. Effects of 60-Hz electric fields on living plants exposed for extended periods, prepared by Westinghouse Electric Corporation and the Pennsyvania State University. EPRI EA-4159, July 1985. vp.

143. Electrical and biological effects of transmission lines: a review, prepared by the Biological Studies Task Team. U.S. Bonneville Power Administration, 1985. 84 pp.

144. The electric impedance of the human body, by Gottfried Biegelmeier. Revue Generale de l'Electricite 11 (1985), 817-832.

145. Epidemiological studies on effects of exposure to ELF electromagnetic fields, by Bengt G. Knave and Siv G. Tornqvist. UNIPEDE Paper 85E90.2, 9 - 14 June 1985. 11 pp.

146. Evaluating compliance with FCC-specified guidelines for human exposure to radiofrequency radiation. U. S. Federal Communications Commission, Office of Science and Technology OST Bulletin No. 65 October 1985. 52 pp.

147. An evaluation of published studies analyzing the association of carcinogenesis with exposure to magnetic fields, by H. Daniel Roth Associates, Inc. March, 1985. EPRI EA-3904.

148. Evaluation of the effects of electric fields on implanted cardiac pacemakers, by A. J. Moss and E. Carstensen. University of Rochester, 1985. EPRI EA-3917.

149. Experimental studies of the effects of high voltage transmission lines on cows, by Jan Hultgren. Swedish University of Agricultural Sciences Project 45/39. Project Memo 1985-07-25. 17 pp.

150. Exposure to transmission line electric fields during farming operations, by Mike Silva and Dennis Huber. IEEE Power Engineering Society Winter Meeting 1985, Paper 85 WM 222-5. 9 pp.

151. Extra-high voltage transmission lines: mechanisms of biological effects on honeybees, prepared by Bioconcern and IIT Research Institute. EPRI EA-4218, August 1985. vp.

152. Growth rate and mitotic index analysis of Vicia faba L. roots exposed to 60-Hz electric fields, by M. Inoue, Morton W. Miller, Christopher Cox and E. L. Carstensen. Bioelectromagnetics 6, No. 3 (1985), 293-303.

153. Health of workers exposed to electric fields, by D. E. Broadbent, M.H.P. Broadbent, J. C. Male and M.R.L. Jones. British Journal of Industrial Medicine 42, No. 2 (1985), 75-84.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

** 154. High-intensity electric field induced mild stress response in animal organ weights, by S. T. Hsieh, J. R. Lymangrover, W. P. Dunlap, D. Majeau-Chargois, C. F. Walker and Y. J. Seto. Bioelectrochemistry and Bioenergetics 14 (1985), 45-56.

155. Histologic study of the internal organs of rats chronically exposed to a high-intensity electric field, by Y. J. Seto, D. Majeau-Chargois, J. R. Lymangrover, W. P. Dunlap and S. T. Hsieh. Journal of Environmental Science and Health. Part A: Environmental Science and Engineering A20, No. 1 (1985), 73-85.

156. Human reactions to transient electric currents: summary report prepared by the Johns Hopkins University for the Canadian Electrical Association and the Maryland Power Plant Siting Program. CEA 116 T 260. vp. October 1985. Summary of 3-year study.

157. IEE Colloquium on "Electromagnetic Interference and Cardiac Pacemakers", co-sponsored by the Biological Engineering Society, the British Pacing Group and the Hospital Physicists' Association, held on Tuesday, 22 January 1985 in London. IEE Digest No. 1985/7. 54 p.

158. An impedance method to calculate currents induced in biological bodies exposed to quasi-static electromagnetic fields, by John F. Deford and Om P. Gandhi. IEEE Transactions on Electromagnetic Compatibility EMC-27, No. 3 (1985), 168-173.

** 159. The incidence of cancer in the Alfta area, by Ylva Rodvall, Maria Feychting and Anders Ahlbom. The National Institute of Environmental Medicine, Stockholm, 1985. NTIS DE86010663. 16 pp.

** 160. Influence of the magnetic field on the plasma proteins of chickens, by M. Lazar and N. Neaga. Revue Roumaine de Biologie. Serie de Biologie Animale 30, No. 2 (1985), 87-93.

161. Interactions between weak electromagnetic fields and biosystems: a summary of nine years of research, by M. Grattarola, A. Chiabrera, R. Viviani and G. Parodi. Journal of Bioelectricity 4, No. 1 (1985), 211-225.

162. Introduction: the role of Working Group No. 4 of Study Committee No. 64 of the International Electrotechnical Commission. Revue Generale de l' Electricite 11 (1985), 803-808.

163. Ion currents and fields of HVDC test lines, by Li Fu-shou, Ni Zuo, Han Zhen-dong and Xiao Pin-de. Proceedings of the International Conference on Gas Discharges & Their Applications (1985), 428-430.

164. Leukemia in electrical workers in New Zealand, by N. E. Pearce, R. A. Sheppard, J. K. Howard, J. Fraser and B. M. Lilley. Lancet April 6, 1985, 811-812.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

165. Leukemia in occupational groups with presumed exposure to electrical and magnetic fields, by Eugenia E. Calle and David A. Savitz. New England Journal of Medicine 313, No. 23 (1985), 1476-1477. Letter to the editor.

166. Leukemia risk among U. S. white male coal miners: a case-control study, by Priscilla A. Gilman, Richard G. Ames and Michael A. McCawley. Journal of Occupational Medicine 27, No. 9 (1985), 669-671.

167. Low-voltage ELF electric field measurements in ionic media, by R. Gundersen and B. Greenebaum. Bioelectromagnetics 6, No. 2 (1985), 157-168.

168. Maryland doctor claims death certificate study links electromagnetic exposure and brain tumors. Electric Light and Power Jan. 1985, 28.

169. Magnetic coupled longitudinal electric field measurements on two transmission lines, by M. J. Frazier and J. Dabkowski. IEEE Transmission on Power Apparatus and Systems PAS-104, No. 4 (1985), 933-940.

170. Milk production, health, behaviour, and endocrine responses of cows exposed to electrical current during milking, by D. V. Henke Drenkard, R. C. Gorewit, N. R. Scott, and R. Sagi. Journal of Dairy Science 68, No. 10 (1985), 2694-2702.

171. The mind fields (Jose Delgado's experiments on animal behaviour in electromagnetic fields), by Kathleen McAuliffe. Omni 7 (Feb. 1985), 41-44, 96, 98, 100-104.

172. Mortality experience of electrical engineers, by R. Olin, D. Vagero and A. Ahlbom. British Journal of Industrial Medicine 42, No. 3 (1985), 211-212.

173. Mortality in workers exposed to electromagnetic fields, by Samuel Milham Jr. Environmental Health Perspectives 62 (1985), 297-300.

174. Neuroblastoma and paternal occupation: a case-control analysis, by Margaret R. Spitz and Christine Cole Johnson. American Journal of Epidemiology 121, No. 6 (1985), 924-929.

175. Numerical calculation and measurement of 60-Hz current densities induced in an upright grounded cylinder, by W. T. Kaune and F. A. McCreary. Bioelectromagnetics 6, No. 3 (1985), 209-220.

176. Occupational exposure to electromagnetic fields and the occurrence of brain tumors: an analysis of possible associations, by Ruey S. Lin, Patricia C. Dischinger, Jose Conde and Katherine P. Farrell. Journal of Occupational Medicine 27, No. 6 (June 1985), 413-419.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

177. People in alternating electric and magnetic fields near electric power equipment, by W. T. Norris, J. C. Male, B. J. Maddock and J. A. Bonnell. Electronics & Power February 1985, 137-141.

178. Polychlorinated biphenyls in the blood of personnel from an electric utility, by Jack D. Sahl, T. Timothy Crocker, Robert J. Gordon and Edward J. Faeder. Journal of Occupational Medicine 27, No. 9 (1985), 639-643.

179. Possible biological effects of 50-Hz electric fields: a progress report, by R. Conti and P. Nicolini. Journal of Bioelectricity 4, No. 1 (1985), 177-193.

180. Powerline frequency electric and magnetic fields: a pilot study of risk perception, by M. Granger Morgan, Paul Slovic, Indira Nair, Dan Geisler et al. Risk Analysis 5, No. 2 (1985), 139-149.

181. Present state of knowledge regarding biological effects of magnetic, electric, and electromagnetic fields, as well as of natural radioactivity in indoor air, by R. Reiter. International Journal of Biometeorology 29, supplement 2 (1985), 115-137.

182. Pulsed electromagnetic fields promote collagen production in bone marrow fibroblasts via athermal mechanisms, by Richard W. Farndale and J. Clifford Murray. Calcified Tissue International 37 (1985), 178-182.

183. Pulsed magnetic field exposure during pregnancy and implications for NMR foetal imaging: a study with mice, by D. McRobbie and M. A. Foster. Magnetic Resonance Imaging 3 (1985), 231-234.

184. The relationship between sensitivity to 60-Hz electric fields and induced transmembrane potentials in plants root cells, by M. Inoue, M. W. Miller, E. L. Carstensen and A. A. Brayman. Radiation and Environmental Biophysics 24 (1985), 303-314.

185. Reply to: Comments on variables in research involving electromagnetic bioeffects, by Robert O. Becker. Journal of Bioelectricity 4 No. 2 (1985), 589-590. Letter.

186. The responses of cells to electrical fields: a review, by Kenneth R. Robinson. Journal of Cell Biology 101 (1985), 2023-2027.

187. Responses of dairy cows to alternating electrical current administered semirandomly in a nonavoidance environment, by R. C. Gorewit, N. R. Scott and C. S. Czarniecki. Journal of Dairy Science 68 (1985), 718-725.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

188. Retardation of embryogenesis by extremely low frequency 60 Hz electromagnetic fields, by Ivan L. Cameron, Keithley E. Hunter and Wendell D. Winters. Physiological Chemistry and Physics and Medical NMR 17 (1985), 135-138.

189. Risk factors for ocular melanoma: western Canada melanoma study, by Richard P. Gallagher, J. Mark Elwood, Jack Roofman, John J. Spinelli, G. B. Hill, W. J. Threlfall and Judy M. Birdsell. Journal of the National Cancer Institute 74, No. 4 (April 1985), 775-78.

** 190. A role for Ca^{2+} in the effect of very low frequency electromagnetic field on the blastogenesis of human lymphocytes, by P. Conti, G. E. Gigante, E. Alesse, M. G. Cifone, C. Fieschi, M. Reale and P. U. Angeletti. FEBS Letters 181, No. 1 (1985), 28-32.

191. Sensitivity of the human eye to power frequency electric fields, by E. L. Carstensen, A. Buettner, V. L. Genberg and M. W. Miller. IEEE Transactions on Biomedical Engineering BME-32, No. 8 (1985), 561-565.

192. "Silent Keys": leukaemia deaths, by J. Seager and Robert D. Currier. Letters to the editor. The Lancet May 11, 1985, 1095-1096.

193. Silent Keys: leukaemia mortality in amateur radio operators, by Samuel Milham Jr. Lancet April 6, 1985, 812.

194. Source of stray voltage and effect on cow health and performance, by R. D. Appleman and R. J. Gustafson. Journal of Dairy Science 68, No. 6 (1985), 1554-1567.

195. Special Report: Power-line fields and human health, by M. Granger Morgan, H. Keith Florig, Indira Nair and David Lincoln. IEEE Spectrum 22, No. 2 (February 1985), 62-68.

196. Study of electric fields and ion effects of HVDC lines, prepared by General Electric's High Voltage Transmission Research Facility. U. S. Department of Energy DOE/RA/50133-T1. NTIS DE86-002465, August 1985. vp.

197. Transmission of electric power at ultra-high voltages: current status and future prospects, by Harold N. Scherer and Gregory S. Vassell. IEEE Proceedings 73, No. 8 (1985), 1252-1278.

198. Ventricular fibrillation of the heart induced by electric current, by J. Weirich, K. Haverkampf and H. Antoni. Revue Generale de l'Electricite 11 (1985), 833-843.

** 199. Weak 50-Hz electromagnetic fields activate rat open field behavior, by Klaus Rudolph, Kurt Krauchi, Anna Wirz-Justice and Hans Feer. Physiology & Behavior 35, No. 4 (1985), 505-508.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

200. White light-electromagnetic field interaction causes a localized destruction of cultured hela cells, by R. Y. Alvarez, L. Rivas, C. Rius and Y. Valladares. Cancer Letters 29, No. 3 (1985), 331-338.

1984

201. Action of constant and low-frequency magnetic fields on biological systems, by L. A. Piruzyan and A. N. Kuznetsov. Biology Bulletin of the Academy of Sciences of the USSR 10, No. 6 (1984), 449-61.

202. An activity systems model for estimating human exposure to 60 Hz electric fields, by Mike Silva, Luciano Zaffanella and Norm Hummon. IEEE Power Engineering Society Summer Meeting 1984, paper 84 SM 671-4. 7 pp.

203. An assessment of the 5-mA 60-Hz contact current safety level, by Robert S. Banks and Tieu Vinh. IEEE Transactions on Power Apparatus and Systems PAS-103, No. 12 (1984), 3608-3614.

204. Assessment of the immune responsiveness of mice exposed to a 1.5-Tesla stationary magnetic field, by T. S. Tenforde and M. Shifrine. Bioelectromagnetics 5, No. 4 (1984), 443-446.

205. Attempts to produce taste-aversion learning in rats exposed to 60-Hz electric fields, by J. A. Creim, R. H. Lovely, W. T. Kaune and R. D. Phillips. Bioelectromagnetics 5 (1984), 271-282.

206. BPA study of occupational exposure to 60-Hz electric fields, by V. L. Chartier, T. Dan Bracken and A. S. Capon. IEEE Transactions on Power Apparatus and Systems PAS-104, No. 3, March 1985, 733-744.

207. Behavioral studies of dairy cow sensitivity to AC and DC currents, by Robert J. Gustafson, Thomas M. Brennan, and Robert D. Appleman. American Society of Agricultural Engineers Paper No. 84-3504. 15 pp.

208. Behavorial studies with mice exposed to dc and 60-Hz magnetic fields, by H. P. Davis et al. Bioelectromagnetics 5 (1984), 147-164.

209. Biological effects of a 765 kV, 60-Hz transmission line on honey bees (Apis mellifera L.): hemolymph as a possible stress indicator, by Vytautas Bindokas and Bernard Greenberg. Bioelectromagnetics 5 (1984), 305-314.

210. Brain tumors linked to EM radiation, by J. Raloff. Science News 126, No. 19 (1984), 292.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

211. Calibration check of Bonneville Power Administration 60-Hz electric field exposure monitor and measurement of its surface field enhancement for various uniform and nonuniform operating configurations, by P. Michael Fulcomer. U.S. Bonneville Power Administration, 1984. NBSIR 84-2885. 18 pp.

212. Cancer cells grow faster under electromagnetic field. Electric Light and Power August 1984.

213. Chronic 60 Hz electric field exposure induced subtle bioeffects on serum chemistry, by Y. J. Seto, F. T. Fox, D. Majeau-Chargois, J. R. Lymangrover, W. P. Dunlap and S. T. Hsieh. Journal of Environmental Science and Health A19, No. 8 (1984), 865-885.

214. Clastogenic effects in human lymphocytes of power frequency electric fields: in vivo and in vitro studies, by I. Nordenson, K. Hansson Mild, S. Nordstrom, A. Sweins, and E. Birke. Radiation & Environmental Biophysics 23 (1984), 191-201.

215. Contractors review: biological effects from electric and magnetic fields associated with high voltage transmission lines, project resumes. Jointly published by U.S. Department of Energy, Electric Power Research Institute and New York State Power Lines Project, 1984.

216. Critical review of epidemiological studies on the relationship between various electromagnetic parameters and the incidence of cancer, by Gilles Theriault. Montreal: McGill University, 1984. 27 pp.

217. Current issues in electric and magnetic field research, by Robert Kavet and Robert Black. American Society of Agricultural Engineers 1984 summer meeting, Paper No. 84-3032.

218. Detection of DC electric dipoles in background fields by the nurse shark, by C. S. Johnson, B. L. Scronce and M. W. McManus. Journal of Comparative Physiology A: Sensory, Neural and Behavioral Physiology (1984) 155, No. 5, 681-687.

219. Development of power system measurements: quarterly report 1 October 1983 to 31 December 1983, edited by R. E. Hebner. U. S. National Bureau of Standards, 1984. NBSIR 84-2861. 19 pp.

220. EM study challenged, by Robert H. Holzworth with a reply letter by Ruey S. Lin. Science News December 15, 1984, p. 379.

365. Stimulation of a Quabain-sensitive Rb+ uptake in human erthrocytes with an external electric field, by Engin H. Serpersu and Tian Yow Tsong. The Journal of Membrane Biology 74 (1983), 191-201.

366. Studies of possible genetic effects in bacteria of high frequency electromagnetic fields, by B. Anderstam, Y. Hamnerius, S. Hussain, and L. Ehrenberg. Hereditas 98 (1983), 11-32.

367. Study of the behavioural and biological effects of high-strength 60 hz electric fields, by the Southwest Research Institute. Washington: U.S. Dept. of Energy, 1983.

368. Technical note: On changes in evaporative heat loss that result from exposure to nonionizing electromagnetic radiation, by E. R. Adair, D. E. Spiers, J.A.J. Stolwijk, and C. B. Wenger. Journal of Microwave Power 18 (1983), No. 2, pp. 209-210.

369. Transmission line electric fields and the possible effects on livestock and honeybees, by J. M. Lee and G. L. Reiner. Transactions of the ASAE Jan/Feb 1983, 279-286.

370. TVA's 500-kV electric and magnetic fields: measurements and analyses, prepared by the Electrical Systems Group of the Tennessee Valley Authority, 1983. U.S. DOE/ET/29016-1. 239 p. NTIS DE84000733.

371. Uniform dc electric field exposure systems for mice and cats, by Tetsuo Kobayashi et al. Bioelectromagnetics 4 (1983), 303-314.

372. Variables in research involving electromagnetic bioeffects: letter to the editor, by Robert O. Becker. Journal of Bioelectricity 2, Nos. 2 and 3 (1983), 213-216.

373. Weak electric fields affect plant development, by Andrew A. Marino, Francis X. Hart and Maria Reichmanis. IEEE Transactions on Biomedical Engineering Vol. BME-30, No. 12 (1983), 833-834.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

1982

374. Adult cancer related to electrical wires near the home, by Nancy Wertheimer and Ed Leeper. International Journal of Epidemiology 11, No. 4 (1982), 345-355.

375. Airborne biological particles and electric fields, by William S. Benninghoff and Anne S. Benninghoff. Radio Science 17, No. 5S (1982), 13S-15S.

376. Bioelectric considerations in the design of high-voltage power lines, by Maria Reichmanis and Andrew A. Marino. Journal of Bioelectricity 1, No. 3 (1982), 329-338.

377. Bronchomotor responses of isolated sheep airways to electrical field stimulation, by J. R. Sheller and K. L. Brigham. Journal of Applied Physiology: respiratory, environmental and exercise physiology 53, No. 5 (1982), 1088-93.

378. Cancer and alternating magnetic field exposure, by N. Wertheimer. Paper presented at the 148th National Meeting of the American Association for the Advancement of Science, 1982. Abstract only.

379. Carcinogenesis and exposure to electrical and magnetic fields, by R. P. Liburdy. New England Journal of Medicine 307, No. 22 (1982), 1402. Letter.

380. Colloquium on "Some Biological Effects of Electric and Magnetic Fields", held on Wednesday, 26 May 1982. London. The Institution of Electrical Engineers, 1982.

381. Development of field-mill instruments for ground-level and above-ground electric field measurement under HVDC transmission lines, by P. Sarma Maruvada, R. D. Dallaire and R. Pedneault. IEEE Power Engineering Society Summer Meeting 1983, Paper 82SM404-2.

382. ELF communications system ecological monitoring program, annual report for aquatic ecosystems: tasks 5.8, 5.9, 5.10, (effects on stream ecosystems), by Thomas T. Burton et al. East Lansing: Michigan State University, 1982.

383. Effect of disturbances on the geomagnetic field on the Circadian rhythm of physiological functions, by G. V. Ryzhikov, V. A. Kuzmenko, and A. B. Buluev. Human Physiology (English translation of Fiziologiya Cheloveka) 8, No. 2 (1982), 87-93.

384. The effect of electric field induced perturbation of the distribution of ions near the cell surface on migration of charged membrane components, by James R. Rabinowitz. Journal of Theoretical Biology 99 (1982), 377-389.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

385. The effect of magnetic field intensities on the oxygen consumption in Porcellio laevis Latre (Oniscoidea, Isopoda), by Monique R. Martel and M. A. Alikhan. Archives Internationales de Physiologie et de Biochimie 90 (1982), 111-122.

386. Effects of ELF fields on calcium-ion efflux from brain tissues in vitro, by C. F. Blackman et al. Radiation Research 92 (1982), 510-520.

387. Effects of electric fields near power-transmission plant, by J. A. Bonnell. Journal of the Royal Society of Medicine 75 (1982), 933-941.

388. The effects of electric fields on the organism of persons in the proximity of power transmission equipment at a voltage of 400 kV or higher, by J. Tuhackova and V. Cenkova. Electra 83 (1982), 111-117.

389. Effects of electromagnetic fields associated with electricity production and distribution: an assessment of present knowledge, by J. A. Bonnell. UNIPEDE Paper No. 90.1 (June 1982). 13 pp.

390. Effects of high-intensity power-frequency electric fields on implanted modern multiprogrammable cardiac pacemakers, by D. G. Barton et al. Journal of the Royal Society of Medicine 75 (May 1982), 327-331.

391. Effects of high-intensity 60 Hz fields on bone growth, by Cedric F. Walker et al. Journal of Bioelectricity 1, No. 3 (1982), 339-349.

392. Effects of high voltage power lines on health: results from a systematic survey of a population sample along the ±400 kV DC Pacific Intertie, by J. R. Nolfi and R. C. Haupt. Montpelier: Associates in Rural Development, Inc., 1982.

393. Effects of induced electromagnetic field on hormonal responsiveness of osteoblasts, by R. A. Luben and C. D. Cain. 183rd American Chemical Society National Meeting, March 28 - April 2, 1982. American Chemical Society Abstracts of Papers 183 (1982), COLL-15.

394. Effects of magnetic field exposure on fertilization success of rainbow-trout, salmo-gairdneri, by J. A. Strand et al. Presented at the 3rd Annual Meeting of the Bioelectromagnetic Society, August 10-12, 1981. Richland: Battelle Pacific Northwest Laboratory, 1981.

395. Effects of nonionizing electromagnetic radiation. Foreign Broadcast Information Service USSR Report: Life sciences 25 October 1982.

396. The effects of phase shifts in a 10 Hz electric field cycle on locomotor activity rhythm of drosophila melanogaster, by Harold Dowse. Journal of Interdisciplinary Cycle Research 13, No. 4 (1982), 257-264.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

397. Effects of 60-Hz electric fields on serotonin metabolism in the rat pineal gland, by Larry E. Anderson, D. Ian Hilton, Richard D. Phillips, B. W. Wilson and Edward K. Chess. Battelle Pacific Northwest Laboratory PNL-SA-10633. NTIS DE85007197. 21 pp.

398. Electric fields induced by EHV transmission over irregular terrain, by H. M. Sendaula, et al. IEEE Power Engineering Society Summer Meeting 1982, Paper 82 SM 477-8.

399. Electrical and biological effects of transmission lines: a review, by Jack M. Lee et al. Portland: Bonneville Power Administration, 1982. 93 pp.

400. Electrical constructions and 50 Hz magnetic fields at the dwellings of tumour cases (0-18 years of age) in the County of Stockholm, by L. Tomenius, L. Hellstrom and B. Enander. Proceedings of the International Symposium on Occupational Health & Safety in Mining and Tunnelling June 21-25, 1982, Prague. 6 pp.

401. Electrical environmental regulations of overhead transmission lines. Gaithersburg: Shah & Associates, 1982. 66 pp.

402. Electromagnetic field exposure and cancer: a commentary from EPRI, by Leonard A. Sagan. Palo Alto: EPRI, 1982. 12 pp.

403. Electromagnetism and life, by R. O. Becker and A. A. Marino. Albany: State University of New York Press, 1982. 211 pp.

404. Embryological changes induced by weak, extremely low frequency electromagnetic fields, by Jose M. R. Delgado et al. Journal of Anatomy 134, No. 3 (1982), 533-551.

405. The evaluation of acceptable limits for UHV transmission line fields, by Edwin L. Carstensen. In Italy - USA Joint Workshop on Ultra High Voltage Transmission Technology, 26-28 July 1982, 25-102.

406. Exposure of mammals and birds to high intensity ac electric field in natural environment: preliminary results of the investigation, by A. Cantone et al. In Italy - USA Joint Workshop on Ultra High Voltage Transmission Technology, 26-28 July 1982, 4-7.

407. Extrapolation to man of the results of experiments conducted on animals exposed to high intensity electric fields: an experimental approach, by R. Brambilla et al. In Italy - USA Joint Workshop on Ultra High Voltage Transmission Technology, 26-28 July 1982, 1-3.

408. Germination and growth of a vegetable exposed to very severe environmental conditions experimentally induced by high voltage, by Takaski Aoki and Shunjiro Ikezawa. Japanese Journal of Applied Physics 21, No. 9 (1982), 1373-1378.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

409. A health and safety evaluation of the ±400 kV powerline: executive summary and minority report, by the Science Advisors to the Minnesota Environmental Quality Board. St. Paul (Minnesota), 1982.

410. Laboratory studies on animals and human beings exposed to 50 Hz electric and magnetic fields, by R. Sander, J. Brinkman and B. Kuehne. CIGRE Proceedings 1982, Paper No. 36-01. 6 pp.

411. Leukaemia in workers exposed to electrical and magnetic fields, by W. E. Wright et al. Lancet II, No. 8308 (1982), 1160-1161. Letter.

412. Local geo-electric fields at the bottom of the sea and their relevance for electrosensitive fish, by N. Pals, R. C. Peters and A.A.C. Schoenhage. Netherlands Journal of Zoology 32, No. 4 (1982), 479-494.

413. Measurement of induced electric fields in a phantom model of man, by Kun-Mu Chen, S. Rukspollmuang, and D. P. Nyquist. Radio Science 17, No. 5S (1982), 49S-59S.

414. Molecular biological implications of electric-field effects, by H. Berg. Studia Biophysica 90 (1982), 169-176.

415. Mortality from leukemia in workers exposed to electrical and magnetic fields (letter to the editor), by S. Milham. New England Journal of Medicine 307, No. 4 (1982), 249.

416. The nature of exposure to low frequency electric fields near electric power transmission plant, by J. C. Male and W. T. Norris. Colloquium on "Some Biological Effects of Electric and Magnetic Fields" 1982, 4/1-10.

417. Neutral-to-earth voltage and ground current effects in livestock facilities, by R. J. Gustafson and V. D. Albertson. IEEE Transactions on Power Apparatus and Systems PAS-101, No. 7 (1982), 2090-2095.

418. Nonionizing radiation protection, edited by Michael J. Suess. Copenhagen: World Health Organization, 1982.

419. Orientation reactions of the dogfish, scyliorhinus canicula, to local electric fields, by N. Pals, P. Valentijn and D. Verwey. Netherlands Journal of Zoology 32, No. 4 (1982), pp. 495-512.

420. Pigs fare well under 345 kV line, by Aly A. Mahmoud and Dean Zimmerman. Transmission & Distribution 34, No. 12 (1982), 28-30.

421. Redistribution of dissolved oxygen concentration under strong dc magnetic fields, by Shoogo Ueno. IEEE Transactions on Magnetics MAG-18, No. 6 (1982), 1704-1706.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

422. Source book: biological effects of transmission lines, by Sigma Associates. Minneapolis: Mid-Continent Area Power Pool (MAPP), 1982. (Summarizes 64 studies.)

423. Static electric and electromagnetic low-frequency fields (biological effects and hygienic assessment) by B. I. Davydov and V. N. Karpov. Kosmicheskaya Biologiya I Aviakosmicheskaya Meditsina 16, No. 5 (1982), 18-23. (Translated into English.)

424. Subjective response to negative air ion exposure, by L. W. Buckalew and A. Rizzuto. Aviation, Space, and Environmental Medicine 53, No. 8 (1982), 822-823.

425. Thermal aspects of biologic effects of electromagnetic fields at the cellular and molecular level, by Andre-Jean Berteaud. Progress in Clinical and Biological Research 107: Biomedical thermology (1982), 197-208.

426. Underground electric power transmission system environmental impact assessment, by Dames and Moore. Washington: USDOE, 1982.

427. The U.S. Department of Energy 60 Hz electric fields bioeffects research, by A. O. Bulawka et al. IEEE Power Engineering Society Winter Meeting 1982, Paper 82 WM 220-2. 9 pp.

1981

428. Analysis of structural chromosome changes and SCE after occupational long-term exposure to electric and magnetic fields from 380 kV systems, by M. Bauchinger et al. Radiation and Environmental Biophysics 19 (1981), 235-238.

429. Biological action of 50 Hz electric field on human organism, by T. V. Kalyada et al. Translated from the Russian by Leo Kanner Associates for Bonneville Power Administration, 1981. Source not given. 7 pp.

430. Biological effects of a 765 kV transmission line: exposures and thresholds in honeybee colonies, by B. Greenberg, V. P. Bindokas and J. R. Gauger. Bioelectromagnetics 2, No. 4 (1981), 315-328.

431. Biological effects of chronic exposure of three generations of miniature swine to 60-Hz electric fields, by R. D. Phillips. Richland: Battelle Pacific Northwest Laboratories, 1981. 5 pp.

432. Biological effects of electric and magnetic fields: summary of a literature study, by Magne Waskaas. Norway: State Institute of Radiation Hygiene, 1981. 44 pp.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

433. Biological effects of electric fields: EPRI's role, by Robert Kavet. Symposium on Biological Effects of Electric Fields, Palo Alto, 15-16 Sept. 1981, sponsored by EPRI and IERE. 7 pp.

434. Biological effects of high-strength electric fields on small laboratory animals: interim report October 1, 1979-March 31, 1981, by R. D. Phillips. Richland: Battelle Pacific Northwest Laboratory, 1981.

435. Biological influences of power frequency electric fields: a tutorial review from a physical and experimental viewpoint, by Jack E. Bridges and Maurline Preache. IEEE Proceedings 69, No. 9 (1981), 1092-1120.

436. Comparative danger of different kinds of current, by V. I. Shchutskii, A. I. Sidorov and Yu V. Sitchukhin. Electric Technology USSR 4 (1981), 109-114.

437. ELF electric field coupling to dielectric spheroidal models of biological objects, by Yih Shiau et al. IEEE Transactions on Biomedical Engineering BME-28, No. 6 (1981), 429-437.

438. The effects of high-voltage transmission lines on honey bees, by Bioconcern. Palo Alto: Electric Power Research Institute, 1981. 68 pp.

439. The electric field effects of overhead powerlines on humans and animals in the Netherlands, by A. H. E. Manders and N. S. van Nielen. Elektrotechniek (Netherlands) 59, No. 7 (1981), 438-449.

440. Electric field research continues. EPRI Journal May 1981, 34-35.

441. Electrical and magnetic fields: effects, dangers and protective measures, by H. H. Egyptien. Elektrotechnische Zeitschrift 102, No. 16 (1981), 877-878. (translated from the German)

442. Environmental power-frequency magnetic fields and suicide, by F. Stephen Perry et al. Health Physics 41 (1981), 267-277.

443. Equivalence criteria among man and animals in experimental investigations of high voltage power frequency exposure hazards, by F. Lattarulo and G. Mastronardi. Applied Mathematical Modelling 5, No. 2 (1981), 92-96.

444. General properties of the interaction between animals and ELF electric fields, by William T. Kaune and Murlin F. Gillis. Bioelectromagnetics 2 (1981), 1-11.

445. Interactive effects in 60 Hz electric field exposure systems, by William T. Kaune. Bioelectromagnetics 2 (1981), 33-50.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

446. Numerical determination of induced currents in humans and baboons exposed to 60-Hz electric fields, by Ronald J. Spiegel. IEEE Transactions on Electromagnetic Compatibility EMC-23, No. 4 (1981), 382-390.

447. Prolonged exposure of mice to 340 KV/m electrostatic field, by Wagih Z. Fam. IEEE Transactions on Biomedical Engineering BME-28, No. 6 (1981), 453-59.

448. Purkinje nerve cell changes caused by electric fields: ultrastructural studies on long-term effects on rabbits, by H. A. Hansson. Medical Biology (Finland) 59, No. 2 (1981), 103-110.

449. Response of honey bees, apis mellifera L. to high-voltage transmission lines, by Bernard Greenberg, Vytautas P. Bindokas, Marvin J. Frazier and James R. Gauger. Environmental Entomology 10 (1981), 600-610.

450. Transmission line electric fields in the agricultural animal environment, by J. M. Lee and G. L. Reiner. Paper presented at the winter meeting of the American Society of Agricultural Engineers, Chicago, Dec. 15-18, 1981.

451. Transmission lines and the environment: papers presented at the CIGRE Symposium, Stockholm, 23-25 June 1981.

1980

452. An assessment of health impacts from electrical-power transmission lines, by Morton W. Miller. 1980. University of Rochester UR-3490-2024. NTIS DE81025192.

453. Biological effects of electric and magnetic fields associated with ELF communications systems, by James D. Grissett. IEEE Proceedings 68, No. 1 (1980), 98-104.

454. Biological effects of 60-Hz electric fields on miniature swine: exposure facility, by W. T. Kaune et al. IEEE Transactions on Power Apparatus and Systems PAS-99, No. 1, 120-128.

455. Biomedical effects associated with energy transmission systems: effects of 60-Hz electric fields on Circadian and Ultradian physiological and behavioral functions in small rodents, by C. F. Ehret et al. Argonne: Argonne National Laboratory, 1980. 80 pp.

456. Cardiovascular response of rats exposed to 60 Hz electric fields, by D. I. Hilton and R. D. Phillips. Bioelectromagnetics 1, No. 1 (1980), 55-64.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

457. Chronic exposure to a 60-Hz electric field: effects on synoptic transmission and peripheral nerve function in the rat, by R. A. Jaffe et al. Bioelectromagnetics 1 (1980), 131-147.

458. Comparison of the coupling of grounded humans, swine and rats to vertical, 60 Hz electric fields, by W. T. Kaune and R. D. Phillips. Bioelectromagnetics 1, No. 2 (1980), 117-129.

459. Do high-voltage overhead lines affect the health of residents? by A. F. Koopman. Elektrotechniek (Netherlands) 58, No. 6 (1980), 379-382.

460. The effect of air ionization, electric fields, atmospherics and other electric phenomena on man and animal, by F. G. Sulman. Springfield: Charles C. Thomas, 1980. 389 pp.

461. The effect of electric and magnetic fields near an HVDC converter terminal on implanted cardiac pacemakers, by the IIT Research Institute. Palo Alto: Electric Power Research Institute, 1980. 90 pp.

462. Electric and magnetic fields produced by transmission systems: description of phenonema, by the CIGRE Working Group 36.01 (Interference and Fields). Paris: International Conference on Large High Voltage Electric Systems, 1980. 139 pp.

463. Electrical fields, calcium gradients, and cell growth, by Kenneth R. Robinson and Colin McCaig. Annals of the New York Academy of Sciences 339 (1980), 132-138.

464. Electrical wiring configurations and childhood leukemia in Rhode Island, by John P. Fulton et al. American Journal of Epidemiology III, No. 3 (1980), 292-296.

465. Impact analysis of electrical transmission lines, by W. R. Kellough. Right of Way, Dec. 1980, 19-25.

466. An interview with Dr. Valery Popkov, member of the Soviet Academy of Sciences, discussing the need for 1,150 kV transmission lines in the Soviet Union and "false alarms" about electric fields. Translated from Vi i Vattenfall 33, No. 8 (1980).

467. Long-term biological effects of very intense 60 Hz electric field on mice, by Wagih Z. Fam. IEEE Transactions on Biomedical Engineering BME-27, No. 7 (1980), 376-381.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

468. Nonionizing electromagnetic radiation safety: a program of coordinated federal activities related to biological effects of nonionizing electromagnetic radiation (0-300 GHz), by the Interagency Task Force on Biological Effects of Nonionizing Electromagnetic Radiation. Washington: National Telecommunications and Information Administration, 1980. 75 pp.

469. Power frequency electric field induces biological changes in successive generations of mice, by A. A. Marino et al. Experientia 36 (1980), 309-311.

470. A study of farm animals near 765 kV transmission lines, by Harold E. Amstutz and David B. Miller. New York: American Electric Power Service Corporation, 1980. 31 pp.

471. A study of possible effects of high-intensity 60 Hz electric fields on primate behaviour, by C. S. Feldstone and R. J. Spiegel. IEEE Region V Conference Digest (1980), 21-24.

472. What are the effects of electrical and magnetic fields on man? by Jean Cabanes. (Paper given at a joint meeting of CIGRE Study Committees 23 and 36, Madrid 1979.) Revue Generale d'Electricite 89, No. 1 (1980), 16-22.

** Entries preceded by a double asterisk are new additions since the 1980-1986 edition of this bibliography.

Foreign Broadcast Information Service 311, 395

Garrison-Spokane HVTL 289

General Electric Company 196, 272

H. Daniel Roth Associates, Inc. 147
Hospital Physicists' Association 157

IEE Colloquium on "Electromagnetic Interference and Cardiac Pacemakers" 157
IEE International Conference on Electric and Magnetic Fields in Medicine and Biology, 4-5 Dec. 1985 139
IEEE-ESMO Conference 1983 300
IEEE National Symposium on Electromagnetic Compatibility 1984 248
IEEE Power Engineering Society 129
IEEE Power Engineering Society Summer Meeting 1982 398
IEEE Power Engineering Society Summer Meeting 1983 280, 381
IEEE Power Engineering Society Summer Meeting 1984 202, 251
IEEE Power Engineering Society Winter Meeting 1982 427
IEEE Power Engineering Society Winter Meeting 1983 314, 347, 354
IEEE Power Engineering Society Winter Meeting 1984 230, 253, 254
IEEE Power Engineering Society Winter Meeting 1985 150
IEEE Region V Conference 1980 471
IEEE Transmission and Distribution Conference 1986 80
IIT Research Institute 140, 151, 461
Institution of Electrical Engineers 380
Institution of Electronic and Radio Engineers 433
Interagency Task Force on Biological Effects of Nonionizing Electromagnetic Radiation 468
International Conference on Gas Discharges and Their Applications 163
International Electrotechnical Commission 162
International Society for Chronobiology 331
International Symposium on Occupational Health and Safety in Mining and Tunnelling 1982 400
International Utility Symposium 81
Italy-USA Joint Workshop on Ultra High Voltage Transmission Technology 1982 405, 406, 407

Johns Hopkins University 156

Kobe University, Faculty of Engineering 293

Leo Kanner Associates 429

Maryland Power Plant Siting Program 156
McGill University 216
Michigan Legislative Science Office 223
Michigan State University 382
Mid-Continent Area Power Pool 422
Minnesota Environmental Quality Board 363, 409

Montana Dept. of Natural Resources and Conservation 289, 353
MVEA Engineering Conference 1983 313

National Academy of Sciences USA 259
National Rural Electric Cooperative Association 81
National Technical Information Service 98, 159, 196, 281, 287, 301, 303, 320, 333, 349, 370, 397, 452
New York Department of Public Service 341
New York State Power Lines Project 215
Norway State Institute of Radiation Hygiene 432

Ontario Hydro 81
Ontario Ministry of Health, Disease Control and Epidemiology Service 25

Pennsylvania State University 141, 142

Randomline Inc. 281

Shah and Associates 401
Sigma Associates 422
Society for Experimental Biology and Medicine 135, 261
Southern California Edison Company 55
Southwest Research Institute 367
Soviet Academy of Sciences 466
State University of New York 403
Sweden National Institute of Environmental Medicine 159
Swedish Cancer Environment Registry 334
Swedish University of Agricultural Sciences 149
Symposium on Environmental Epidemiology 1984 256

Tennessee Valley Authority 370
Transmission (WEST) Associates 55

UNIPEDE 145, 389
University of California, Lawrence Berkeley Lab 48, 301
University of Pittsburgh 256
University of Rochester 148, 452
University of Waterloo 258
